LEGEND AND NOTES

THIS SURVEY WAS PERFORMED USING G.P.S. (GLOBAL POSITIONING SYSTEM) PROCEDURES AND EQUIPMENT. THE BASIS OF BEARINGS WAS BASED ON WGS-84 DATUM.

NARRATIVE

This survey was performed at the request of the Town of Tabiona, for the purpose of establishing the boundary lines around the Town's spring areas and associated right-of-ways. The boundary around Parcel A was established as shown in order to encompass 1.0 acres. Bureau of Land Management monuments were found at the Northeast Corner and East Quarter Corner of Section 36 and the line between these monuments was used as the basis of bearings for this survey. Several rebar marking the corners of Lots 16 through 19 of MOUNT TABBY SPRINGS PLAT "4" were found as indicated on the plat. Quite large discrepancies were found in the spatial relationship between some of these rebars. The record position of these lots as well as several lots in PLAT "7" were plotted and overlaid on this survey to determine the "best fit" position of these lots on the ground. Those rebar whose field position most closely matched the record position were used to orient the survey. The several property descriptions were then prepared.
